BOILER UNIVERSITY WARE

TRAINING BUILT FROM THE BOILER ROOM UP

Boiler University, a division of WARE, has turned decades of experience from the industry's leading professionals into engaging, hands-on courses designed with the way you learn in mind. Our program is accredited by Western Kentucky University and a perfect continuing education platform for anyone who manages or operates a boiler room.

Boiler University began in 1993 and has grown to include a 12,000 sq.ft. state-of-the-art facility with Boiler Lab that provides hands-on opportunities with our four fully operational boilers and other essential boiler room equipment such as a deaerator, feedwater tank and more.

LEARN FROM THE PROS

Jude Wolf

With over 25 years of field service experience, Jude has worked on nearly every type of boiler system. Known for his calm, practical teaching style, he helps students connect real-world service skills in the boiler room.

Scotty Hollis

Backed by more than 20 years in boiler service and combustion systems, Scotty brings deep technical expertise to every class. Students appreciate his straightforward teaching style and deep understanding of boiler room challenges.

Chad Marlow

With more than 30 years in the boiler and HVAC industry, Chad brings extensive experience in boiler service, start-up, and combustion tuning. He teaches every Boiler U class with a practical, field-tested approach.

"We've worked on boilers our whole lives. Now we teach others how to master them."

- Jude Wolf, Senior Boiler University Instructor

HANDS-ON LEARNING IN A LIVE STEAM ENVIRONMENT

Boiler U 201: In-Depth Coverage of the Boiler Room, Components, Operations

This broad spectrum course at our Louisville facility provides hands-on opportunities with our four fully operational boilers and other essential boiler room equipment such as a deaerator, feedwater tank, glass piped steam and condensate system demonstrator.

Recommended For: A great start for anyone or the next step if you did the 101 online course. A great refresher course for seasoned contractors and operators.

3 DAYS | $2,200.00 | 24 student class

Boiler U 301: Hands-On Firetube and Deaerator Open/Close

Learn every step in properly preparing your pressure vessels for an annual inspection.

Recommended For: Whether you are taking full responsibility for this task, or supervising and want it done correctly, this class provides the experience opening, preparing and closing boilers and equipment.

3 DAYS | $2,500.00 | 6 student class

Boiler U 302: Principles and Combustion

This class starts with combustion theory and moves to the boiler lab to apply that theory with linkage and parallel position tuning on standard and low NOx burners.

Recommended For: Technicians or maintenance personnel tasked with combustion tuning who need better understanding of the goals and methods.

3 DAYS | $2,500.00 | 6 student class

Boiler U 303: Hands-On Flame Safeguard and Boiler Control Wiring

Every device and safety on a boiler/burner system is critical for safe and reliable operation. Learn what they are, how they operate, how to wire and troubleshoot them yourself using several flame safeguard platforms.

Recommended For: Anyone responsible for troubleshooting or upgrading boiler control systems. Some prior electrical experience recommended.

3 DAYS | $2,500.00 | 8 student class

Hands-on | Beginner | Next step after 101 | Advanced

All classes include a hot breakfast and lunch.

BOILER UNIVERSITY WARE

AN INVESTMENT IN EDUCATION IS AN INVESTMENT IN PLANT SAFETY

Training doesn't just improve knowledge, it transforms performance.
Every Boiler University course builds safer habits, sharper skills and stronger maintenance programs that reduce downtime, save money and protect your most important asset: your people.

Boost Efficiency

Training keeps systems running at peak performance through proactive maintenance.

Improve Safety

Better-trained operators make safer decisions and recognize risks before they escalate.

Reduce Downtime

Skilled teams solve issues faster, minimizing production losses and costly shutdowns.

Build Confidence

Attendees leave Boiler U empowered and capable to handle real-world boiler challenges.

Stay Current

Stay up to date on the latest combustion, control and efficiency technology.

Lower Costs

Reduce outsourcing by developing in-house boiler expertise that saves long-term labor costs.

ONLINE BOILER UNIVERSITY

Our online courses bring the same trusted Boiler U expertise to your screen. Perfect for new hires or anyone needing a quick, foundational understanding of boiler operations.

Our on-line courses allow you to take this comprehensive training at your convenience over a 30 day period.

All online classes include a completion certificate.

Online Boiler U 101: Introduction to the Boiler Room

Introduction to the boiler room, covering all of the important aspects from water treatment, to boiler operations, to condensate systems. This media-rich class offers a great first look at boilers for beginners, a great review for operators and will provide a roadmap to keep your boiler room on the right track.

Beginner

Online | $795.00

Modulation Motors Course

Honeywell Modutrol Motors are used throughout the boiler world for firing rate position control, feedwater valve positioning and many other applications. We will guide students through their applications, setup and testing.

Next step after 101

Online | $295.00

> The training gave me a better understanding of the boiler operation, safety and maintenance. I'll be able to apply what I learned directly to troubleshooting, improving efficiency and preventing issues before they start. It strenghtened my confidence with boiler systems.

- Jason A., Maintenance Mechanic
Boiler U Attendee

CUSTOMIZED TRAINING TO YOUR FACILITY AND EMPLOYEES

Custom On-Site Training

When you need to train your entire maintenance team, Boiler University can come directly to you.
Our instructors — all seasoned boiler service technicians — deliver customized, hands-on instruction that fits your operation, equipment and safety standards.

Whether you're onboarding new staff, refreshing seasoned operators or building a maintenance department from the ground up, Boiler U's custom training programs are designed to strengthen your team's confidence and reduce your downtime.
